Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt of specification, amendment and remarks all dated 6-9-04 is acknowledged.

Claims 1-7, 14, 16-23, 48-56 and 60-84 are pending in the instant application.

Response to Arguments

Applicant's arguments filed 6-9-04, with respect to the outstanding rejections of the previous action have been persuasive and therefore the rejections have been withdrawn:

However, upon reconsideration the following new rejection has been applied:

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7, 14, 16-23, 48-56 and 60-84 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-37 of U.S. Patent No. 6,797,743 in view of JP405000912A.

'743 patent claims recite a polymeric composition having antimicrobial properties comprising a polymer, an antimicrobial agent and a cross linking agent, wherein the antimicrobial agents of the patented claims are metals or metal alloys or chelated metals. The

Art Unit: 1615

above-patented claims recite the same polyamide, cross-linking agent and the also same method of preparing polyamide polymer as that of the instant claims. The patented claims differ from the instant claims in the specific antimicrobial agents. Instant claims recite antimicrobial agents such as gentian violet, iodine etc., whereas patented claims recite metal ions.

JP teaches antimicrobial and antimycotic materials such as thiosulfate-silver complex prepared by reacting a water-soluble silver salt with thiosulfate or sulfite, a plant extract, a quaternary ammonium salt, chlorhexidine gluconate, etc., is used. Thus, JP teaches both metals as well as quaternary compounds as equivalent in their antimicrobial activity. Accordingly, it would have been obvious for one of an ordinary skill in the art at the time of the instant invention to use any known antimicrobial such as quaternary compounds or a metal chelate, as antimicrobial agent in the polymer composition of '743 with an expectation to achieve the same antimicrobial effect.
